# Environment and Energy Use Policy

## Fakiragram College, Fakiragram

### Introduction

The need for energy and fuels is one of the most extensive issues in history and is related to development communities. A society that works for sustainable future should use only energy resources that cause no or limited environmental effect. The adverse environmental impacts of energy sources can be in part overcome through increased energy conservation.

Fakiragram College, Fakiragram has framed its Environment and Energy usage Policy to manage energy in a systematic manner so as to minimize its impact on the environment. The policy aims to explore the renewable energy resources to reduce the burden of the college and to find out substitute natural resources as solutions to the energy issues.

### Objectives

The main objectives of Environment and Energy Usages policy are,

- To assess the energy usage, measure and its impact on the environment.
- To reduce air pollution emissions using environment-friendly vehicles, including bicycles, public transportation and use of pedestrian-friendly roads.
- To fit LED bulbs in the college campus.
- To install solar panels for the generation of alternate energy.
- To develop systematic waste management mechanism.
- To undertake tree plantation in almost all the activities of the college as a continuous and permanent project.
- To take additional measures for legitimate use of energy consumption
- Plan to collaborate with the town committee, government/non-government agencies, affiliating university working in the areas of environment, climate, energy efficiency and sustainable development; to sign MOUs with them as and when possible.
- To organize awareness and training programme on energy saving measures.
- To encourage employees and students to engage in initiatives those contribute to environmental protection.
- To celebrate important commemorative days related to environmental issues to strengthen the environmental awareness, knowledge and skills of staff and students of the college by undertaking outreach programs.
- To periodically undertake various quality audit, namely, Green audit, Energy audit, Environmental audit, etc. and to take necessary action as per recommendations of the respective audit.

### Conclusion

The Policy on 'Environment and Energy Usage' has an important role in supporting energy conservation in the college premises as it can produce an adequate environment that finally leads to savings and also helps to impose regulations for proper energy management, promote recycling and energy recovery. The Policy, its objectives and targets will be reviewed on a regular basis.
